

### **Drawing Project: Geographical Self-Portrait**

The parameters of this assignment are a bit more narrow than the others. In this assignment, you are to find 4 or 9 images of places that are important to you (hence the title 'Geographical Self-Portrait'). Find images of these places on google earth and take a screenshot - make sure it's a good angle. Once you have your references, create your grid: 2x2 or 3x3 cells. Within each cell, you will draw the content of one of your screenshots. This is all to be done with pencil or micron pen. You may also use india ink with varying levels of dilution. Minimum size 12"x16".
